Phoenix Audio - Quattro2

High Definition, Wide Band Audio with True Full Duplex Table Top Conference Phone

Tremendous clarity without attenuation of the send or receive signals. We incorporate latest in digital signal processing and technology including 4 microphones, 4 speakers, 5 echo cancellers, proprietary beam forming array algorithms, voice activity detectors, de-reverb, steady state noise attenuators, and AGC to name a few.

All Quattro2's come standard with USB connectivity (MT301) for desktop video conferencing, soft phone, internet phone, or recording applications.

They can also be ordered with a secondary interface for Digital Phone Sets (MT305), PSTN (analog) phones (MT302-1L), or Daisy Chain connections (MT304).

Key Features and Benefits:

- **Easy to Install** – Unlike some competitors there is no software or drivers to download.
- **Easy to Use** – Control all units from any Quattro2 in the chain or run it from your PC
- **Bridging** – USB and telephone connections can be bridged together for a three way call
- **Exceptional Output** - 4 powerful speakers allows everyone in the room to hear the call.
- **Expandable** – Daisy chain modules together to satisfy any size or shaped room.
- **About half the size of the competition** - 7 inches in diameter and 2.5 inches tall
- **External Microphone/Speakers Connection:** the 3.5mm jack on the Quattro2 can be configured to be used with an external microphone and/or speakers. The user will have the ability to define this jack for the following parameters:
 - External speakers (default)
 - External microphone with following options:
 - Mic level
 - Phantom yes/no (3V)
 - Line Level such as a wireless lavalier
 - Control the sensitivity of the microphone
 - In room sound reinforcement (“voice lift”)
 - External microphone and external speakers
- **Connects to PC's or MAC's**
- **Reprogrammable memory** - enabling the saving of the audio setup parameters on the unit itself.
- **Soft Dialing for the PSTN** model (MT302) – Dial via a soft key pad on your PC screen.
- **Two Year Warranty** – Twice the industry standard
